PERSONAL STATEMENT

Motivated second-year AI and Data Science undergraduate and current IEEE CIS Industry Outreach Lead. Hands-on experience building Python and Java applications, a machine learning model and responsive websites. Passionate about problem-solving and continuous learning, with a strong interest in developing intelligent, data-driven solutions. Seeking an internship to apply my skills in real-world projects within a collaborative team.

PROJECTS

Student Performance Predictor **2026**
Technologies: Python, scikit-learn, Streamlit
Machine learning project comparing Linear Regression, Decision Tree and Random Forest models to predict student maths scores, with a deployed Streamlit app.

Library Management System (Python) **University Coursework**
Technologies: Python, CSV, Plotly
Console application for managing books, students and loans with validated CSV storage, loan rules and Plotly trend visuals.

Library Management System (Java) **University Coursework**
Technologies: Java, JavaFX, CSV
JavaFX desktop application that imports and validates library CSV data, generates reports and supports title search.

Smart Event Volunteer Coordination System **DSA Coursework**
Technologies: Java
Java-based system for coordinating event volunteers, developed for the Data Structures and Algorithms module.

Civic Loop **Web Technologies Coursework**
Technologies: HTML, CSS, JavaScript, XML
Responsive community services directory with category filtering, built with HTML, CSS, JavaScript and XML data.

Personal Portfolio Website **2026**
Technologies: HTML, CSS, JavaScript, GitHub Pages
Responsive portfolio website presenting my education, skills, projects and experience, hosted on GitHub Pages.
